ACADEMIC PROJECTS

ResumeCheck (AI Resume Screener)

[Live Project](#)

- Engineered a full-stack automation tool using **FastAPI** and **Python** to rank candidate resumes against job descriptions.
- Implemented intelligent PDF parsing and data extraction, hosted the deployment on Vercel for real-time accessibility.
- Optimized the backend for modularity, allowing for rapid iteration of AI screening logic.

VibeCheck (RefactorAgent)

[IN-PROGRESS]

- Developing a tool to refactor AI-generated code into clean, modular, and production-ready components.
- Building a **React** interface to visualize code quality feedback and automated documentation.
- Focusing on high-accuracy code transformations and developer productivity workflows.

DealFinder

[WORKING]

- Designing an application to track and aggregate real-time deals across various digital platforms.
- Implementing web scraping and API integration to provide users with optimized price comparisons.

EDUCATION

B.Tech in Computer Science & Engineering (AI)

2022 – 2026

Relevant Coursework: Data Structures & Algorithms, DBMS, Networking, AI

DEVELOPMENT PHILOSOPHY

- Passionate about local LLM deployments (Ollama) and optimizing dev environments with WSL2.
- Interested in the intersection of AI productivity and self-improvement content creation.
